### **Mr. Smith ~ PE**

We are still having a great time in Ocotillo Ridge PE! The students participated in kickball and Wiffle ball games to develop catching, kicking, and batting skills. They learned about the similarities and differences between the two sports and participated in regulation games. The students showed maximum effort and displayed great sportsmanship while working in teams. We have also been working on frisbee throwing and catching skills. The students learned how to correctly perform the backhand throw and practiced the “alligator” catch. At the end of class, they played “Frisbee Knock Em’ Down” where they used foam frisbees to knock pins down on the other team's side. It gave them a chance to use offensive and defensive strategies while practicing their new found skills. Soon we will play Ultimate Frisbee so the students can showcase their skills and get some vigorous exercise while having fun!

It will be warming up soon, so please remind your child to dress accordingly on PE days and bring plenty water. I am excited to hold my PE classes under our new solar panels! They provide us with a nicely shaded area that protects us from the harmful effects of the sun. I am looking forward to a great fourth quarter in ORE PE!

### **Mrs. Samuelsen ~ Young Innovators**

Quarter 3 has been filled with ENERGY, and not just from the students! :) We have learned that energy is “the ability to do work”, or as a first grader put it, “the power to do stuff”. We have learned about potential and kinetic energy, as well as conducting experiments in energy transfer from one form to another, constructing wind turbines and anemometers, and learning more about light energy. We have had a great deal of fun with our energy unit!

### **Mr. Bowie ~ Art**

Art is the expression of human creative skills and imaginations. Art is alive at ORE, as students create beautiful and meaningful pieces, using various techniques and imagination. This was manifested in their displays at Vail Pride Day, as they transformed the simple elements of art into concrete spectacular beauty. Great commendation to our young ORE artists. I am proud of you.
